

# MOSQUITO & MIDGE SLAYER

100 g/L BIFENTHRIN

For the control of adult mosquitoes and midges, on external surfaces of buildings & structures.

Check out overleaf for details.

# MOSQUITO & MIDGE SLAYER

Surefire MOSQUITO & MIDGE SLAYER, containing 100g/L Bifenthrin, is a powerful knockdown and residual pesticide. Mosquitoes & midges are controlled by direct contact with spray and also by residual action as they come into contact with treated surfaces.

### Residual Surface Treatments:

Apply prepared solution to indoor and outdoor surfaces where insects rest or harbour. Internal harbourage sites include (but are not restricted to) areas such as walls, fly screens, behind and under sinks, under furniture and indoor plants. External harbourage sites include (but are not restricted to) areas such as building exteriors, eaves, walls, fences, also garages, sheds, gazebos, ornamental plants, bushes, shrubs, hedges, shady or damp areas around buildings. Reapply as necessary. When applying to vegetation, ensure that spray penetrates entire plant or hedge and covers both leaf surfaces.

### Perimeter treatments:

Apply the prepared solution to a band of soil or vegetation two to three metres wide around and adjacent to the structure. Also treat the foundation of the structure to a height of approximately one metre. Use a spray volume of 5 to 10 L per 100 m<sup>2</sup>. Higher volumes of water may be needed if organic matter is present or foliage is dense.

DO NOT use this product at less than label rates.  
DO NOT apply to mud, sand mangrove or aquatic habitat.  
DO NOT apply as an Ultra Low Volume (ULV) treatment or via thermal fogging equipment.
