

Protech™

CRACK AND CREVICE

Designed for the Professional.

Introducing **Protech** Crack and Crevice insecticide spray — a Pyrethroid-based aerosol formulated for use as a flying insect killer and as a residual treatment for cockroaches. Specifically designed for the pest professional, it provides rapid knock-down of insects by direct contact AND offers extended residual effectiveness on surfaces! — A very cost-effective solution in a variety of pest situations.

Protech™

a PCT product

PEST | CONTROL | TECHNOLOGIES
INTERNATIONAL PTY LTD

Protech is suitable for the following pests:

- ➔ **FLYING INSECTS:** flies and mosquitoes - spray a short 1-2 second burst for quick-kill contact.
- ➔ **CRAWLING INSECTS:** indoors, spray window sills, doorways, skirting boards, cracks and crevices, under sinks and appliances, around water pipes. Outdoors, spray around garbage bins and infested areas. Keeps on killing for up to 4 weeks. Best of all, Protech is low-odour and non-staining.

Protech is available now in a 416g aerosol can, or as a carton of 12. Includes a nozzle extension tube for precise placement of the product in cracks and crevices, or in hard-to-reach areas. Use the nozzle alone for a coarse, high-volume spray, or use the extension tube in those places where finer atomization of the product is required. Protech is a water-based formulation to ensure non-staining.

Active Constituents:
1.5g/Kg Cyphenothrin
1.5g/Kg Tetramethrin

APVMA Approval № 62274/416g/1107
AQIS Approval №: (pending)
