

SPECTRUM 350SC

350 g/L IMIDACLOPRID

A soil applied treatment for the control of greyback and Childers canegrub in sugarcane and silverleaf whitefly in various vegetable crops.

Check out overleaf for details.

SPECTRUM 350 SC

SOIL INSECTICIDE

Surefire SPECTRUM 350SC, containing 350g/L Imidacloprid, is a soil applied treatment for the control of greyback and Childers canegrub in sugarcane and silverleaf whitefly in crops such as capsicum, eggplant, sweet potato & tomatoes.

SUGARCANE APPLICATIONS:

Apply only as a subsurface soil application. Apply in no less than 1.5 litres of water per 100 metres of cane row (equivalent to no less than 100 L/ha of water for single row cane with 1.52 m spacing between rows).

Greyback canegrub

Twin coulter method: Apply subsurface behind twin coulters to a depth of 100-125 mm. Coulters should be spaced 220 mm to 500 mm apart, one either side of the centre of the stool. Coulter slits should be in the sides or top of the stool mound rather than at the base. Narrow spacings may not be possible with advanced ratoon growth. DO NOT apply using narrow spacings if ratoon growth is advanced such that excessive crop damage from equipment may result.

Single coulter method ("stool split"): Apply subsurface behind a single coulter in the centre of the stool. DO NOT apply using this method if ratoon growth is advanced such that excessive crop damage from equipment may result. This method is not suitable for all areas.

Childers canegrub:

Twin coulter method: Apply subsurface behind twin coulters to a depth of 100-125 mm. Coulters should be spaced 220 to 350 mm apart, with one coulter on either side of the centre of the stool.

VEGETABLE APPLICATIONS:

Apply as a sub-surface trickle irrigation injection, as a furrow spray pre-plant or as a plant hole drench. Refer to the label booklet for specific instructions.

DO NOT use on crops produced hydroponically or in glasshouses and other covered situations.
DO NOT apply Surefire Spectrum 200SC Insecticide or any other Group 4A Insecticide as a foliar spray after soil application of Surefire Spectrum 350 SC Soil Insecticide in that crop.
DO NOT apply more than one application of Surefire Spectrum 350 SC Soil Insecticide per crop for vegetables or per ratoon crop for sugarcane.
