RESIDUAL TERMITICIDE

PCT's TERMINADE residual termiticide gives you excellent value in a 100g/L Fipronil termite control product. Label application rates can be used for:

- ◆ Pre/ Post Construction barriers
- ◆ Reticulation Systems (Altis & Camilleri)
- ◆ Wall Cavity treatments
- ◆ Protection of poles & fence posts
- ◆ Nests in poles & trees

Available in an easy-pour 2.5 litre bottle, Terminade is exceptionally low-odour, readily & cleanly emulsifies with water, and is applied easily through PCO's standard pumping equipment, without leaving or accumulating any residues. Throughout the manufacturing process, TERMINADE is tested for particle size & consistency, in accordance with ISO 9001 requirements. And TERMINADE's active ingredient, Fipronil, demonstrates superior efficiency in controlling termites; the label states for a minimum of 8 years!

The mixing & application rates are 600ml per 100 litres of water (full details on the approved label). TERMINADE is a premium, quality product intended strictly for professional use.

And it is manufactured right here in

Australia, with each bottle having a tamper-evident cap, your extra assurance that you are purchasing a top - quality product. PCT's TERMINADE also represents fantastic value for you in your business as a termite management professional - see your authorised TERMINADE stockist below for a price comparison!
