INSECTICIDE RESISTANCE WARNING

For insecticide resistance management, Insectigone Insecticide is a Group 3A insecticide.

GROUP 3A INSECTICIDE

some naturally-occurring insect biotypes resistant to Insectigone Insecticide and other Group 3A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Insectigone Insecticide or other Group 3A Insecticides are used repeatedly. The effectiveness of Insectigone Insecticide on resistant individuals could be significantly reduced.

Since the occurrence of resistant individuals is difficult to detect prior to use, PCT International Pty Ltd accepts no liability for any losses that may result from the failure on Insectigone Insecticide to control resistant insects.

Insectigone Insecticide may be subject to specific resistance management strategies. For further information contact your local supplier, PCT International Pty Ltd representative or local agricultural department agronomist.
