

INSECTIGONE*

INSECTICIDE

WITH DELTAMETHRIN

 For control of a range of insect pests in various situations as per the Directions for Use Table

Insectigone Insecticide

- With Deltamethrin, the low toxic synthetic pyrethroid. A long lasting low repellent formulation
- Schedule 5 signal heading
- A suspension concentrate - easy to pour, measure and mix
- Solvent free - the end use product is less likely to harm equipment and seals
- Does not readily fall out of suspension in the mixed form thus ensuring the even spread and dispersion of the active ingredient during application
- Non staining
- Practically no odour
- No visible residue
- Non-flammable
- Biodegradable
- Effective indoors and outdoors
- AQIS approved
- Effective in domestic, commercial, industrial and institutional accounts
- Used to treat a broad range of pests: cockroaches, fleas, spiders, ants, silverfish, carpet beetles, clothes moths, bird mites, bed bugs, mosquitoes, house flies, various timber borers and quarantine pests
- Effectively treats a broad range of surfaces: interior and exterior, porous and non porous, cracks and crevices, carpets, fabrics and timber
- Packaged in a variety of containers including the squeeze and measure containers designed to minimise operator exposure

INSECTIGONE - DIRECTIONS FOR USE. RESTRAINT - Do Not apply spray treatment if rain is imminent

SITUATIONS	PESTS	STATE	TREATMENT RATE	CRITICAL COMMENTS
Domestic, Commercial, Industrial and public buildings	Cockroaches, fleas, spiders, ants, silverfish	All states	Initial treatment 150 mL	On non-porous surfaces dilute with 5L of water and apply as a course spray at a rate of 5L per 100m ² of surface, not exceeding the point of run-off. On porous surfaces or use through power equipment, dilute with 10L of water and apply per 100m ² of surface, not exceeding the point of run-off.
	Carpet beetles and clothes moths. Bird mites, bed bugs	NSW, Qld, SA, WA, TAS, ACT, NT only	Maintenance Treatments 75 mL	
	Mosquitoes	Qld, SA, WA, TAS,	75mL	
	Houseflies	NT, NSW, Qld, SA, WA, only	75mL	
Wildflowers for export	Quarantine Pests	TAS, ACT, NT , WA only	250mL to 100L of water	Flowers must be totally submerged in the diluted product for not less than 1 minute and then left to dry naturally for 2 hours.
For short term protection of freshly felled pine logs prior to debarking	Five spined bark beetle, Ips grandicollis	All states & NT	100mL	Dilute with 10L of water and apply through knapsack or power sprayer at the rate of 10L 100m ² of surface area.
For short term protection of freshly felled logs, poles, and posts and sawn timber including in situ timbers	Beetle family Anobiidae, Beetle Family Bostrychidae, Beetle Family Lyctidae	Qld, NSW, VIC, SA, TAS, ACT, NT only		Dilute with 10L of water and apply through knapsack or power sprayer at the rate of 10L per 100m ² of surface area. NB - for best results apply promptly after felling or sawing operations.
